Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 7 and 8 are rejected under 35 U.S.C. 102(e) as being anticipated by Olivera *et al.*

US 6,438,201 B1. Olivera *et al.* shows all of the features of the instant invention including a method for radiotherapy using a gantry, a source and devices to shape and modify the beam intensity (column 7 lines 5-37) where measured output is used to calculate and accumulated dose using a dose algorithm (column 7 line 66 – column 8 line 33 and column 9 lines 44-65) and comparing to the intended dose (column 9 line 66 – column 10 line 17) without the patient present (column 8 lines 20-39 and 46-48).

Allowable Subject Matter

3. Claim 9 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
4. The following is a statement of reasons for the indication of allowable subject matter: claim 9 requires that the method as claimed take place while treating the patient. Since Olivera *et al.* uses a post-patient detector, it does not anticipate claim 9, which contains the limitation “prior to impinging upon the patient”. Olivera *et al.* anticipates claims 7 and 8 when used with a

phantom before treating the patient. A positive recitation of a pre-patient detector would obviate the rejection of claims 7 and 8 using the Olivera *et al.* reference.

Response to Arguments

5. Applicant's arguments, see Submission of Response, filed 5 Dec 2003, with respect to claim 9 have been fully considered and are persuasive. The final rejection of claim 9 has been withdrawn.
